

The Geat Dipper project

"I would like for any situations to have creativity and to enjoy them. "

From March 19, the account text of the right is published to its blog, and it is appealing for power saving.

It not only merely calls out, but it has proposed the method of everybody's laughing. After the East Japan great earthquake on March 11, for a while, the impending world changed very and got confused.

The Sendai central part in which I live had little damage.

Although it became the shortage of goods immediately after the earthquake disaster, it returned to the life near every day immediately.

In the Sendai central part with little damage, there was a battle with the "guilty feeling" over a stricken area.

It saw also here and there which is asking for the outlet of "desire to be helpful to people."

Immediately after the earthquake disaster, people of the another prefecture worried also about the thing of Sendai with little damage by having reported only the images of the area with tsunami damage.

Although it heard for the direction in Sendai to have said to the direction of an another prefecture, "Settle down to a slight degree", the goodwill of people of an another prefecture was not able to be seen go in such a direction.

Moreover, it would be isolated under the influence of an earthquake disaster, and I would like you to relieve a feeling at least to people who cannot do it at all but cannot but wait for rescue.

I would like to fulfill "the feeling to make some" of people of an area with little damage including Sendai.

Bring the goodwill of people of an another prefecture in the direction with which people of a stricken area are actually pleased.

I would like to carry out that it is beneficial to disaster victims.

Everybody wants to have creativity and to carry out that he can enjoy himself.

Then, the Great Dipper project was started.

The text of an attached sheet is spread by means, such as reproduction, to a mail transfer and a blog, and it appeals for "pleasant power saving" to everybody in the world.

By participation in a project, power saving is help [area / required].

Power saving also becomes the declaration of intention of "doing one's best together" from the area which is not required.

It urges "enjoying oneself with creativity" by appealing for looking for the Greats Dipper.

A situation is caught to plus with creativity and it promotes turning around the situation.

I think that it is the power of art.

There are various situations and people of a variegated sense of values merely in practice.

It is appealing for participation of the project by the means of "mail transfer" and "blog" reproduction so that it may not become forcing, and only a candidate can participate.

To Whom It May Concern

I'm ujimari in Sendai.

Impolite because of power saving at transmission by package I do.

You in the world saved electricity, and it rose in order to send more

the feeling which thinks of disaster victims to disaster victims

"the Great Dipper project."

It is happy if each press can spread a text by reproduction,

word-of-mouth communication, etc. to printing, a mail transfer,

a twitter, or a blog below.

Please participate, supposing you approve.

ujimari

Do you turn off neither heating nor electricity all together,

and offer a prayer to the Great Dipper every night until the

problem of the Fukushima nuclear power plant is solved?

If electricity is turned off all together, a star will surely be seen

also all over a town.

I will pray to the Great Dipper which becomes a key which

knows a direction and a spring constellation!

"May the direction of missing is found!"

"The isolated one can continue seeing a useful way straight."

"May it go people which passed away to heavens with no problem!"

I will pray to the Great Dipper just like a "ladle", a "pan", and a

"frying pan"!

"May what has early warm you of Ishinomaki and

Higashimatsushima is eaten!

To people which are present in a shelter in order to escape

the radiation which leaked from the Fukushima nuclear power plant

"It is a beautiful starlit sky today also."

"Everybody in the world is praying to the starlit sky."

"Everybody in OK and the world is praying."

I will look up at a starlit sky outside in rare cases,

and will feel cold air.

It will bring near an important person and each other's body

under a wintry sky.

I will turn off the heating and will feel the warmth of bedding.

Your action of the leads to everybody's happiness.

I will turn off electricity and the heating and will pray to

the Great Dipper everybody in the world, and tonight!

"May the goods reach people of Ishinomaki or

Higashimatsushima early!"

"May the problem of the Fukushima nuclear power

plant is solved early!"

I pray to the Great Dipper under the empty in Sendai today also.

It is happy, if it can pray to the Great Dipper until you also

approve and the problem of the Fukushima nuclear power

plant is solved.

March, 2011 Aoba-ku, Sendai-shi ,Japan

* The transmission welcome of this text

* The reproduction welcome to your blog

* Welcome that I also have you spread by word of mouth.

* It is happy, if it can spread rapidly so that everybody's feeling of the world may reach a disaster victim.
